PROFILE

Computer Science Engineering undergraduate with a basic understanding of programming and software development concepts. Comfortable working with structured tasks, documentation, and team-based projects. Willing to learn, take guidance, and improve skills through hands-on experience in a professional environment

PROJECTS

Quiz App

- Worked on designing a quiz application with focus on user experience and clarity.
- Ensured smooth flow, easy understanding, and clear result feedback for users

Financial Analysis Report

- Developed an interactive Financial Analysis Report using Power BI to visualise and evaluate the annual financial performance of companies based on real-world datasets.
- Created visual reports to present information in a simple and understandable way.
- Focused on explaining insights clearly to non-technical users using dashboards.

Civic & Welfare Response System

- HelpHub allows citizens to easily report public issues using text, voice, or images. It supports multilingual reporting with automatic location tagging. Reports are forwarded to volunteers/admins for faster resolution. The system improves transparency and community participation in civic welfare

Skills

- Power BI
- Excel & PowerPoint
- Tableau
- SQL (Basic)
- HTML,CSS
- Python

ACHIEVEMENTS

- Completed online certifications in programming and web development.
- Self-learned tools such as Excel, SQL, Power BI, and Tableau for analytical and visualization tasks.
- Active participant in college-level technical and teamwork-oriented projects.
